Conclusion:

While there are other companies offering Small Parcel Invoice Auditing, you can see from the above Competitor Analysis that Ship Watchers offers and includes more options, tools, and features over other similar companies in the industry. It is important to note that Ship Watchers also has a proprietary Network that utilizes algorithms, outside resource/government tables, and historical client data to cover more audit points without human error while also providing a lower fee for service. Ship Watchers is a global logistics invoice audit and pay provider that offers its solutions to clients without any term contracts, up-front fees, monthly charges, or obligation to continue if you are not satisfied.
