

Ship Watchers -Common Audits and Reports

1 Accessorial Charge Summary by Account Number

This is a summary of all accessorial charges by account number. For example, an extra charge like a destination charge or fee for handling hazardous materials may apply to certain shipments. Also referred to as value-added service charges, you can add them to your shipping selection as needed. Value-added services are location-dependent.

2 Accessorial Charge Summary by Invoice Number

This report summarizes all accessorial charges by Invoice Number

3 Account Summary Report

Summary of total transaction, billed weight, charges and percentage spent for each account number.

4 Address Correction Listing

This report provides detailed information about shipments that received an address correction. The original ("wrong") address and the corrected address are provided for each shipment.

5 Adjustment Detail by Invoice Number

This report provides in-depth detail of all adjustments that show on your invoice. Whether the adjustment is a negative or positive, credit or debit. Full visibility for each is demonstrated. This report will allow you to drill down on each adjustment type individually for a better look.

6 Adjustment Summary by Invoice Number

This report provides a snapshot of all adjustments appearing on a particular invoice number.

7 Charge Category Code Summary by Invoice Number

This report lists all the Charge Category Detail Codes within each Charge Category Code. It can be used to ascertain accessorial charges applied to a shipment or a charge refunded for a shipment due to either Voids, GSR (Guaranteed Service Refunds), Residential Adjustments, chargebacks, etc.

8 Charge Code Detail by Invoice Number

This report is a detailed breakdown of Charge Category Detail Code fields by invoice number. It lists all the charges that were applied to a shipment or adjustment of charges that were erroneously applied or credited to the shipment. Charge Category Detail Codes are all the charges applied to a shipment
